(Optional) Did you change your model preference? Anything else to add?

2 responses

I'm not very familiar with the models besides Chargpt, and looking at the prompts and the answers gemini seems to be more easy to use and clear as in I can understand it beter than the other 2 models. So i guess i changed my model preference from chagpt to gemini.

Even though some LLMS performed on some aspects better than others. I am sticking to chatgpt since its predictable, follows the prompt the most and since not a single LLM performed perfectly or semi- perfectly.
